DETAILED ACTION

Allowable Subject Matter

1. Claims 1-118 are allowed.
2. The following is an examiner's statement of reasons for allowance:
 - (A) With respect to independent claims 1, 31, 60, and 90, prior art fails to disclose an apparatus useful for gas phase analysis of ions comprising:
 - a) an hour glass electrodynamic funnel formed of at least an entry element, a center element, and an exit element, each of the elements having an aperture, and wherein the entry element is aligned such that a passageway for charged particles is formed through the aperture within the entry element, through the aperture in the center element, and then through the aperture in the exit element, and wherein the aperture in the center element is smaller than the aperture of the entry and exit elements, and
 - b) a drift tube, wherein the hourglass electrodynamic funnel forms the entrance to the drift tube thereby providing a passageway for ions generated in a relatively high pressure region at the exterior of the drift tube to a relatively low pressure region at the interior of the drift tube through the elements. Prior art also fails to disclose a dual entry hourglass electrodynamic funnel formed of at least two entry elements, or one comprising a drift tube having an internal ion funnel with a relatively small aperture and at least one element having a relatively large aperture positioned at the exit of the drift tube, wherein the element having the small aperture is positioned to transfer ions from the drift tube.

(B) With respect to independent claims 46 and 105, prior art fails to disclose method and apparatus for gas phase analysis of ions comprising the steps of:

(a) providing a drift tube having an internal funnel having a relatively small aperture and also a large aperture positioned at the exit of the drift tube and wherein the element having the small aperture is positioned to transfer ions from inside of the drift tube out of the exit the drift tube, and (b) providing ions into an entry to the drift tube at the end of the opposite to the ion funnel.

Claims 2-30, 32-45, 47-59, 61-89, 91-104, and 106-118 are allowed by virtue of their dependencies on the independent claims 1, 31, 46, 60, 90, and 105.
